

Telephones

All patient rooms have a personal phone at the bedside with an individual number. This number can be given to your family and friends at your discretion.

- Your family and friends may dial 870-239-7 (plus your room number) to reach you.
- You may make telephone calls at any time. If you require assistance or experience any problem with your phone, please dial 0 for the hospital's operator .

For local calls, dial 9, wait for the dial tone and dial the number

Long distance is not available from Patient Rooms unless using a calling card or calling collect. To make a long distance call, you must dial 9 to get a outside line, and than either dial the number on your calling card or dail "0" to speak to an operator to make your collect call.
